Univerzitná nemocnica Martin	Martin	00421 43/4203591	
Fakultná nemocnica s poliklinikou Žilina	Žilina	00421 41/5110376	

Abortion is an essential health care service. It should always be provided in accordance with the needs of women and girls and be easily accessible. This means that they should be provided with adequate information on abortion and the facilities where it is performed. We bring a list of these facilities we made in June 2021 and updated in the year 2023.

YOU HAVE THE RIGHT TO SAFE ABORTION

You have the right to decide freely if and when you have children. This also includes the right to access abortion in a timely, barrier-free and respectful manner. No one may harm you or put you under any pressure. You are the one who knows best what to do and what your life circumstances are. However, women in Slovakia face many obstacles in accessing abortion care.

To make the access to safe abortion easier, we established a support service:

+421 910 350 444

or

support@moznostvolby.sk

It is important to us that you are not under any pressure or take any unnecessary risks.
Your health is important to us.

FACTS ABOUT ABORTION*

- Abortion is one of the safest medical procedures if it is done correctly – performed by trained staff, under hygienic conditions and using appropriate medical techniques and medications.
- Most women who get a professionally performed abortion do not suffer any lasting health and reproductive health consequences.
- Abortion does not increase the risk of breast cancer.
- An abortion that was carried out without any complications does not reduce your chances of getting pregnant in the future. There is no proven link between abortion and subsequent infertility.
- Abortion does not lead to serious mental health problems. Negative mental health consequences occur in very few cases and are rather a continuation of pre-existing mental health problems.

**These facts are based on the findings and statements of authorities such as the World Health Organisation (WHO), the International Federation of Gynaecology and Obstetrics (FIGO) and the Royal College of Obstetricians and Gynaecologists of the United Kingdom of Great Britain and Northern Ireland.*

PRACTICAL INFORMATION

TIME IS AN IMPORTANT FACTOR

You can get an abortion on request or on medical grounds **up to the 12th week** of pregnancy in Slovakia. After that, it is only possible if the woman's life is in danger, if the foetus is not viable or if it is severely damaged.

The beginning of the pregnancy is dated from the first day of the last menstrual period. Therefore, in reality, you have less than 12 weeks. In addition, you also have to expect a **48-hour waiting period** after you undergo counselling by the doctor. This medically unjustified delay may cause that you cannot have an abortion within the legal time period.

Girls younger than 16 years need a consent of a parent or legal guardian. Parents of girls aged between 16 and 18 will be informed by the health facility.

PRICE

The Regulation of the Ministry of Health of the Slovak Republic sets the maximum price for an abortion at 248.95 EUR. The price is not always respected and the information on what is and what is not included in the price is often not available. For example, the fees for pre-operative examination, filling out an application form, or for a bed per day increased the price. Therefore, please request information about the total price in advance. If you don't have sufficient funds, we will provide you with advice on possible financing options.

METHOD

In Slovakia, only the surgical form of abortion is available at the moment, not the medical form.

If you need information or advice on reproductive health, particularly on the provision of safe abortion, please contact us.

+421 910 350 444

or

support@moznostvolby.sk

Monday to Wednesday: 12:00 to 18:00
Thursday: 9:00 to 15:00

WHAT DO WE OFFER?

- information on abortion, methods and legal conditions of its provision
- contact details of health facilities that provide abortion care, support in communicating with them and, if necessary, proxy direct communication
- supportive, confidential and caring counselling (we trust the callers and support them in their own decisions)
- provision of further contacts, referral to other institutions in order to solve the situation
- support in crisis, stabilisation; we can accompany you via telephone and assist you in crisis situations
- advice on options of financing abortions

Counselling is provided in **Slovak** and **English**, with interpretation into **Ukrainian** if necessary.
